

## **The Core Flow-Based Market Coupling project finished all main deliverables in preparation of the go-live on 8 June 2022**

The Core Flow-Based Market Coupling project parties announce that the project finished all main deliverables and initiated the final preparations towards the go live of the Core Flow-Based Market Coupling on 08/06/2022, first trading day for delivery on 09/06/2022. The design and procedures are now fully tested, and all required contracts are concluded as well. Project parties are confident to provide a robust and stable system.

More details can be found [here](#).

### **OTE, a.s.**

*The joint-stock company OTE, a.s., (OTE) has been operating on the electricity market in the Czech Republic since 2002 and on the gas market since 2010. OTE is a provider of comprehensive services to individual participants in the electricity and gas market. According to §20a of Act No. 458/2000 Coll., On business conditions and the performance of state administration in the energy sectors and on the amendment of certain acts (Energy Act), OTE is a holder of a license for the activities of a market operator, which includes the electricity and gas market in the Czech Republic.*

*OTE organizes trading on the day-ahead, intraday and block electricity market as well in the intraday gas market. OTE also offers participants in the electricity and gas market in the Czech Republic continuous processing and exchange of data, information for clearing and financial settlement of deviations between contractual and actual values of electricity and gas supply and consumption, and ensures administrative change of supplier of both commodities. At the same time, it manages the national greenhouse gas emissions register. OTE is responsible for the administration of the financial remuneration system for supported energy sources.*

*The joint-stock company OTE is appointed the nominated organizer of the electricity market (NEMO), by the Energy Regulatory Office. As a NEMO, OTE ensures a uniform interconnection of day-ahead and intraday markets and on behalf of market participants reports trading data from the short-term markets into the database of the Agency for the Cooperation of Energy Authorities (ACER).*
