1 Web services

Web services allows automatic access to some data that are published on our web site (www.ote-cr.cz) The technology is wide-spread and has an implementation in many programming languages. For its use is necessary to have a program that will process, store and display to user.

Current implementation uses Python app.server Zope with SOAP library [SOAPpy 0.11.6](#) with server extension [SOAPSUPPORT 0.7.2](#).

1.1 Compatibility

Services on current public web got through upgrade. Compatibility with previous client version (OTE Win client version 1.1.2.0 and OTE WWW services version 1.1.2.0) are not supported yet.

1.2 WSDL

Service is available at <http://www.ote-cr.cz/services/PublicDataService>. WSDL is available at same link by sending HTTP GET request, or at <http://www.ote-cr.cz/services/PublicDataService/wsdl>

WSDL Extract:
